

Comparing Neurons

Name: _____

Date: _____

Instructions: Below is a Venn Diagram that will help you compare two types of human cells, outlining their similarities and differences. Fill in the sides of the circles, thinking about the differences between the cells, writing the unique characteristics of body cells vs neurons. In the center where the circles intersect, write the similarities of the two types of cells i.e. the characteristics that are identical in both body cells and neurons.

What's so special about neurons? Why do they have this particular shape?
